## #2\_ BIOLOGICAL FICTIONS

### Interactive and immersive installation

#### SCIENTIFIC CHALLENGE

Bright, fanciful and imaginary creatures take life on the lace curtains of a huge body. They evolve and move, staging a biological fiction which does not stop changing. An imaginary and technological ecosystem.

#### ARTISTIC CHALLENGE

This multimedia, immersive and interactive work from Golnaz Behrouznia, is centered on the alive and made the spectators live a journey inside an imaginary world. In a vast and dark environment, a spatial structure occupies the space as a floating organic architecture. Sound atmospheres emerge discretely, according to the states of this universe. At the same time, this fictitious ecosystem, autonomous and sensitive to the outside presence, activates visual and sound reactions and evolves according to the visitors' behavior.
